

**Whirlpool Service Parts Return
Independent Service Network Program**

Since the part numbers required for return are constantly changing there will not be a published list of these parts.

However, you can easily identify the parts needed to be returned by the part label. Anytime you see a green label similar to the one below, Whirlpool would like it back.

Don't forget to write the serial number of the product on the green label prior to mailing!!!

Thank you again, for doing your part in making certain there are parts available in the future and keeping our landfills free of recyclable goods.
